Integrate Management System Policy

(Quality, Environment, and Occupational Health and Safety)

CEGIS is a scientifically independent multi-disciplinary organisation that performs innovative and comprehensive knowledge-based integrated environmental services for the improvement of livelihood and sustainable environment using state of art technologies like GIS, RS, IT, and Database. It provides solutions to issues and problems – based on local realities – that are feasible from socio-economic and institutional points of view – in the sectors of water and land resources, climate change and disaster risk management, engineering, agriculture, fisheries, river morphology, forestry, and environment.

CEGIS is highly committed to delivering the highest quality services for its clients through timely project submission, highest quality reporting with authentic data, appropriate analysis, innovative research, and relevant training.

CEGIS is devoted to conserving nature and natural resources by solid waste management, reduction of energy consumption, prevention of injury and ill health eliminating hazards, and reducing OH&S in workplace.

CEGIS has strong systematic research and capacity development programs and conducted a number of training programs on most of the aforementioned issues for the senior and midlevel engineers, professionals, scientists, and managers of the government and non-government organisations on GIS, Remote Sensing, Delta and Coastal Morphology, Climate Change and Disaster Management, Land Acquisition and Resettlement Management, and Modeling both at home and abroad.

CEGIS is committed to compliance with all applicable legal and other requirements related to its core activities, and continual improvement of quality services, environment, and execution of occupational health and safety by setting up the relevant objectives and programs, CEGIS is firmly committed to ensuring regular consultation and participation of its professionals and staffs in various OH&S issues.

CEGIS is regarded as a Center of Excellence nationally and Internationally for advisory services, research, database development and management, and training for capacity development in a wide group of national and international organisations for purposes of enhanced efficiency in planning, implementation, and monitoring of projects and programs. Similarly, gained a reputation of being the leading organisation in Bangladesh in the fields of integrated environmental analysis of different sectoral projects.

Malik Fida A Khan

Executive Director, CEGIS
